(React, Context, JavaScript, Leaflet JS, Netlify, Disease.sh API)

EXPERIENCE

SOLUTION DEVELOPER | BPM-D, Mumbai, India

March 2019 – November 2019

- Worked on BPM-D's SaaS B2B platform built on Angular and PHP for businesses to implement strategies by creating and tracking projects and measuring their impact on their processes
- Understood requirements from product managers and translated them into trackable tasks in form of Stories on JIRA.
- Created Wireframes on Adobe XD based on requirements and collaborated with teammates to brainstorm ideas related to them.
- Created proof of concepts for new features to evaluate and test how the final version will work.
- Performed code reviews to achieve clean maintainable code and ensuring standard practices are implemented.

ASSOCIATE SOLUTION DEVELOPER | BPM-D, Mumbai, India

May 2017 – Feb 2019

- Built features including interactive dashboards comprising of many smaller data visualization widgets and information panes to view and edit data.
- Create reusable components and libraries, thereby improving efficiency and decreasing code.
- Led the team in the design and development of a major feature in form of an Assessment functionality meant for businesses and completed it before the deadline.
- Migrated Windows batch files to shell scripts to move from a XAMPP to Docker.
- Fixing bugs occurring in the app and logging it in JIRA to track and collaborate with testers.

EDUCATION

Interactive Media Management | Centennial College, Toronto, Canada

Jan 2020 to Feb 2021

Bachelor's in Computer Science | Royal College of Arts Commerce and Science, Mumbai India

Jun 2014 to March 2017
