(React, Context, JavaScript, Leaflet JS, Netlify, Disease.sh API)

EXPERIENCE

SOLUTION DEVELOPER | BPM-D, Mumbai, India
March 2019 – November 2019

- Worked on BPM-D's SaaS B2B platform built on Angular and PHP for businesses to implement strategies by creating and tracking projects and measuring their impact on their processes
- Understood requirements from product managers and translated them into trackable tasks in form of Stories on JIRA.
- Created Wireframes on Adobe XD based on requirements and brainstorm possible changes with teammates.
- Created proof of concepts for new features and evaluate and test how the final version will work.
- Performed code reviews to achieve clean and maintainable code quality and ensuring standard practices are implemented.

ASSOCIATE SOLUTION DEVELOPER | BPM-D, Mumbai, India
May 2017 – Feb 2019

- Migrated Windows batch files to shell scripts to move from a XAMPP to Docker.
- Built features including interactive dashboards comprising of many smaller data visualization widgets and information panes to view and edit data.
- Create reusable components and libraries, thereby improving efficiency and decreasing code.
- Worked on major features for the App including design and development of an Assessment functionality meant for businesses.
- Fixing bugs occurring in the app and logging it in JIRA to track and collaborate with testers.
- Versioning tools
- Wroked

E D U C A T I O N

Interactive Media Management| Centennial College, Toronto, Canada
Jan 2020 to Feb 2021

Bachelor's in Computer Science | Royal College of Arts Commerce and Science, Mumbai India
Jun 2014 to March 2017
