Saifil Momin

Detailed oriented Software developer with 4 years of experience working with cross functional teams. Adept to both independent and collaborative projects with emphasis on UI/UX and performance.

Experience

Webisoft, Montreal (Remote from Toronto)

Software Developer | April 2021 – current

- Implemented a desktop app with React and Electron capable of OTA updates for a healthcare company for managing medication records.
- Implemented client side of a crypto exchange app in React by integrating terra wallet and fetching data from smart contracts to create data visualizations.
- Added ability to load app through an iframe onto a third-party partner's websites based in Laravel 5.
- Significantly improved performance for a React project by reducing the render time by half using react profiler and react memo.
- Deployed apps using Amazon EC2 and implemented SMTP using amazon SES.

Standout Project: Led communications with client for implementation of a note taking app designed for Mental Health Professionals. Implemented features like authentication, user settings, onboarding tours and dashboard using React, React-bootstrap, Recoil, Styled Components, Axios and React Beautiful dnd.

BPM-D, Mumbai

Solution Developer | *March 2019 – November 2019*
Associate Solution Developer | *May 2017 – Feb 2019*

- Implemented features such as Dashboards and information panes for BPM-D's SaaS B2B platform built on Angular.
- Understanding requirements from consultants and translating them into wireframes and later proof of concepts.
- Built reusable UI components like form controls to improve efficiency and decrease code redundancy.
- Built a horizontal tree diagram visualization, where each node was draggable within their constraints and could be auto aligned based on click of a button.

Standout Project: Built a prototype for an effort vs time visualization bubble chart to prioritize tasks using D3.js and Angular withing 1 week. Users could drag and drop bubbles from chart to a different quarter based on time and effort.

Education

Interactive Media Management | *Jan 2020 to Feb 2021*
Centennial College, Toronto, Canada
(Relevant Coursework: UI/UX design, Accessibility in coding and project management)
